

TRAFFIC Recommendations on the Proposals to Amend the CITES Appendices at the 16th Meeting of the Conference of the Parties

Proposal #/ Proponent	Species covered by the proposal	Proposal	RECOMMENDATION
# 40 Australia	<i>Rheobatrachus silus</i> (Southern Gastric-brooding Frog)	Deletion from Appendix II	The last record of the Southern gastric-brooding frog <i>Rheobatrachus silus</i> in the wild was in 1981 and the species has been classified as Extinct by IUCN since 2002. In the highly unlikely event of its rediscovery, there is no reason to assume it would be affected by trade and commercial export, which would anyway be prohibited by Australian legislation. ACCEPT
