

TRAFFIC Recommendations on the Proposals to Amend the CITES Appendices at the 16th Meeting of the Conference of the Parties

Proposal #/ Proponent	Species covered by the proposal	Proposal	RECOMMENDATION
# 68 Madagascar	<i>Uncarina stellulifera</i> Uncarina	Inclusion in Appendix II	<p><i>Uncarina stellulifera</i> has a relatively wide distribution in south-west Madagascar. It is in cultivation, and is reportedly easy to propagate. Recent trade outside Madagascar appears to be very largely in seeds. Some export of plants, presumed wild-collected, has taken place in the past, although there is no indication of ongoing export of wild-collected plants. The scale of the reported trade is very small compared with the likely population of the species based on observed densities. Based on available information this species does not appear to meet the criteria for inclusion in Appendix II.</p> <p>REJECT</p>
